

ABGENIX NEW RESEARCH FACILITY

Client: SRG Partnership (Architects) with Thereof Thompson Architects
Portland, Oregon

Value: \$20,000,000

Description: The Abgenix facility in Burnaby, BC, is a research and production center which specializes in the raising of mice for bio-medical research.

The building and site, which was modified to accommodate Abgenix, was formerly a dairy processing facility for Foremost Dairy Products. Extensive modifications were required to the building and underground services to meet the current BC Building Code and the special requirements of Abgenix .

Scope: SDE provided complete civil engineering design services for the upgraded building including a new potable water supply, fire protection, and sewers, site drainage and grading.
