

## NEW RICE MILL INSTALLATION

---

---

Client: Labatt Canada, British Columbia

Description: The installation of a new rice mill, platforms, chuting (including pneumatic conveying system and aspiration piping modifications) was to upgrade and replace equipment which was being removed, and shipped to an existing plant in Newfoundland. The work also included the generation of complete as-builts for the existing installation.

Equipment was supplied by Buhler Canada, and required both plant and vendor interface.

Scope: SDE provided Complete Civil, Structural and Mechanical design services for the removal of the existing equipment, and the installation of the new mill, chuting and related equipment
